<sup>1</sup>The capacity estimates for each school have been rounded to the nearest 25 and may change every year because of program changes, grade level realignments, and/or changes in the need for special education services.

<sup>2</sup>The minus sign (-) indicates the school has student spaces available.

<sup>3</sup>These portables are not used as instructional classrooms. The following are examples of portables utilized for non-instructional purposes: in-school suspension, storage, cafeteria, offices, and restrooms.

<sup>4</sup>Design work is currently underway for the replacement of the HVAC at this facility. As each area of the building undergoes construction, students in those affected classrooms will be temporarily relocated. Ten portable classrooms have been placed on site for this purpose.
